Dear Sir/Madam,

I am currently seeking new challenges in the field of Graphic Design and I believe there may be a position available within your organisation that would meet the challenges I am looking for.

I am currently the principal in house designer for a reputable countrywide organisation but am looking for a broader and more diverse range of projects. I have vast experience and competency in meeting deadlines and workloads. I have, in the past also worked for several companies working solo and as part of a team on numerous projects from beginning to completion. I have designed logos, stationary and other associated paraphernalia as well as packaging, brochures, press advertising and other promotional regalia. I have also put together magazine layouts, websites, radio advert scripts as well as vehicle & shop signage and many more.

As you can see from my CV I have a considerable amount of experience and I am highly competent with Adobe Photoshop, Illustrator and Quark Express. I have also worked with many other programmes including Adobe Image ready, Premiere, After Effects, Dreamweaver, Director and Flash.

I hold a BA degree in Design in Interactive Media & a Diploma in Visual Communications (Graphic Design) from IADT

I am always eager to learn new skills and abilities as well as experience new and different aspects of the design process.

Attached, please find a copy of my resume as well as a small selection my work

I also have a comprehensive portfolio of design work for inspection.

Should you wish to consider me for any position available, please do not hesitate to contact me on mobile 087 4117852 or email to noisymute@gmail.com.

Regards  
Jonathan Barry
